David Merrill opened Merrill Chiropractic on February 6th, 1993. He began with his wife and mother as the only staff. They were blessed that first day with 12 new patients, and it took from 8:00 am to 8:00 pm to process each of them. Since that beginning we have focused exclusively on the *Gonstead technique* as the vehicle to restore joint and nerve dysfunction in the spine and extremities. This technique of spinal examination and correction is safe and specific. In addition to a strong practice, Dr. Gonstead also developed a research database to support the science behind the Gonstead difference for spinal restoration.
